

BAHA BAHA VILLAS

Developer Brief

Prepared by Jess Morrell · WILBA · wilba.ai

To: Griffin (Developer) · 24 March 2026

USD \$1,800 setup + \$300/month

What This Is

WILBA's first hospitality client. Sean owns a surf/accommodation property in West Sumbawa, Indonesia called Baha Baha Villas. We scoped two AI automations on the discovery call (23 Mar 2026).

Phase 1	Daily Ops Brief	2 weeks
	Every morning at 6am WITA — pulls all bookings, emails the team: check-ins, check-outs, transfers, in-house guests, upcoming arrivals. Zero manual admin.	USD \$800 setup USD \$150/mo
Phase 2	AI Email Receptionist	2 weeks
	Monitors Gmail inbox every 15 min. Detects guest language, classifies intent, drafts reply in their language. Owner reviews before sending (auto-send for FAQs).	USD \$1,000 setup USD \$150/mo

Tech Stack

Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Layer' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='Layer', textColor=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph	Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Tool' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='Tool', textColor=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph	Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Notes' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='Notes', textColor=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph
Hosting	Render.com	Same as WILBA audit pipeline — cron jobs
PMS	Booking Layer	REST API — needs key from Sean
Channel Manager	ChanX	Connects BL to OTAs — we don't touch directly
Surf vendor	World Safaris	Manual Google Sheet (MVP); email parser Phase 2

AI	Claude API	Haiku for daily brief; Sonnet for email responder
Email delivery	SendGrid	Already in WILBA stack
Guest inbox	Gmail	OAuth 2.0 — one-time setup with Sean
Language	Python 3.11	Consistent with audit pipeline
Timezone	WITA (UTC+8)	Same as Bali

What's Already Built

<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'File' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='File', textColor=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>	<pre>Paragraph('caseSensit ive': 1 'encoding': 'utf8' 'text': 'Status' 'frags': [Par aFrag(__ta g__='para', bold=1, fon tName='Hel vetica-Bold' , fontSize=8 .5, greek=0, italic=0, link=[], rise=0, text ='Status', te xtColor=Co lor(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>	<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Notes' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='Notes', textColor=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>
scripts/baha_baha_daily_brief.py	■ Built	Needs Booking Layer API key to test
scripts/baha_baha_email_responder.py	■ Built	Needs Gmail OAuth to test
scripts/requirements-baha-baha.txt	■ Done	All Python deps
outputs/baha-baha/system-design.md	■ Done	Full architecture, API endpoints, email format
outputs/baha-baha/booking-data-model.md	■ Done	Room/package schema — names are placeholders
outputs/baha-baha/discovery-notes.md	■ Done	Tech stack, open questions
outputs/baha-baha/proposal.md	■ Done	Sent to Sean — scope, pricing, timeline

Waiting On Sean (Blockers)

Item	Action	Why
------	--------	-----

■	Booking Layer API key	Sean: account settings → API → Generate key	Core data source — nothing runs without this
■	Booking Layer access	Add jessmorrell@gmail + Griffin as Manager/Dev	Was due 25 Mar — confirm done
■	Gmail OAuth setup	5-min call with Sean to authorise the bookings inbox	Email responder can't run without this
■	World Safaris sample email	Sean to forward one booking confirmation	Needed to design the email parser (Phase 2)
■	Exact room/villa names	As they appear in Booking Layer (Baja room, studio + others)	Placeholders in data model now
■	Exact package names	Accommodation only, surf, meals, combos — as in BL	Same — need real names
■	Daily brief recipients	Who gets the morning email (names + addresses)	Sean + team — confirm list
■	Brief send time (WITA)	What time should it land in their inbox?	Default: 6:00am WITA

Key Intel from Discovery Call (Fireflies, 23 Mar)

Team	Sean (owner/decisions) · Mashī (Booking Layer + ops) · Danny (transport/flights)
Rooms confirmed	Baja room, Studio (+ others TBC) — studio + 2-bed need to link as a group unit; BL can't do this yet. Mashī is working on it.
Agencies	One Wave (12.5% commission) · World Safaris (20%) · via ChanX channel manager
Primary guest channel	WhatsApp — more important than email. Phase 1 chatbot should prioritise WA over email.
Scope note	Sean described Phase 1 as: chatbot on website + WhatsApp + Instagram. Our proposal has daily brief as Phase 1. Needs alignment — Jess is following up with Sean.
BL user access	Jess needs to be re-added as Manager (jessmorrell@gmail.com). Developer also needs adding. Sean's deadline was 25 Mar.
Accounting	Journal.co.id + Moka POS are disconnected. Out of scope for Phase 1 — do not build anything that assumes accounting integration.
Google Drive	Content is disorganised. Blocks any future content automation. Not our problem for Phase 1.

Render Deployment

<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Service' 'frags': [Para Frag(__tag__='para', bold=1, fontName='Hel vetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='Service', textCol or=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>	<pre>Paragraph ('caseSen sitive': 1 'e ncoding': 'utf8' 'text': 'Type' 'frags': [P araFrag(_ tag__='p ara', bold=1, fo ntName=' Helvetica- Bold', font Size=8.5, greek=0, italic=0, link=[], rise=0, tex t='Type', t extColor= Color(1,1, 1,1), us_li nes=[])] 'style': 'bu lletText': None 'debug': 0) #Paragra ph</pre>	<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Schedule (UTC)' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='Schedule (UTC)', textColor=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>	<pre>Paragraph('caseSensitive': 1 'encoding': 'utf8' 'text': 'Script' 'frags': [ParaFrag(__tag__='para', bold=1, fontName='Helvetica-Bold', fontSize=8.5, greek=0, italic=0, link=[], rise=0, text='Script', textColor=Color(1,1,1,1), us_lines=[])] 'style': 'bulletText': None 'debug': 0) #Paragraph</pre>
baha-daily-brief	Cron Job	0 22 * * * (= 6am WITA)	scripts/baha_baha_daily_brief.py
baha-email-responder	Cron Job	* / 15 * * * *	scripts/baha_baha_email_responder.py

Environment Variables (add to Render):

- ANTHROPIC_API_KEY — already set (shared with audit pipeline)
- SENDGRID_API_KEY — already set (shared with audit pipeline)
- BOOKING_LAYER_API_KEY — from Sean's Booking Layer account
- EMAIL_CREDENTIALS_JSON — OAuth credentials for bookings Gmail
- EMAIL_TOKEN_JSON — OAuth refresh token
- BRIEF_RECIPIENTS — comma-separated email list for daily brief
- BRIEF_SEND_TIME — e.g. "06:00" WITA

Questions for You

Booking Layer API

Once Sean sends the key, can you hit /reservations and confirm field names match what's in the script? Docs suggest standard REST but worth validating against a live endpoint.

World Surfaris MVP

Proposing a manual Google Sheet for Phase 1. Does the script handle this already, or do you want a different fallback?

Gmail OAuth on Render

Audit pipeline uses env vars for credentials. Same approach here? Or prefer a secret file?

Phase 1 scope

Sean mentioned chatbot (WA/IG/website) as Phase 1 in the call, but our proposal has daily brief as Phase 1. I'm aligning with Sean — let me know if this changes your architecture significantly.

Bigger Picture: Once live, this becomes WILBA's Hospitality AI Receptionist template — resold to surf resorts, retreat centres, and boutique properties globally. Baha Baha is the pilot. Let's make it bulletproof.
